## Cyrus A. Peterson, Battle of Pilot Knob Research Collection

### Provenance, Scope, Conventions, Contents and Seriation

Sometime near the end of the nineteenth century Dr. Cyrus Peterson, of St. Louis, conceived the idea of a book about the Civil War Battle of Pilot Knob, Missouri (26th and 27th of September 1864). Dr. Peterson was strongly pro-Union in his outlook. He was raised in a family thoroughly supportive of the Union side, and his experiences as a youth in southern Missouri during the war helped to reinforce the basic sympathies<sup>1</sup>. To develop a foundation for his work on the event he contacted Union survivors of the battle to get their firsthand accounts. This correspondence with Union veterans comprises the bulk of the collection. As a means of expanding his sources he wrote state and federal agencies to obtain names and records of persons involved in the battle. The establishment of a broad base of contacts with surviving Union veterans resulted in the organization of the Pilot Knob Memorial Association to promote reunions of the Pilot Knob veterans and strong activity to establish Ft. Davidson (the Union stronghold at Pilot Knob) as a permanent memorial. Much of the later correspondence involves these concerns. Dr. Peterson's book was co-authored by Joseph Mills Hanson; it was titled "Pilot Knob, the Thermopylae of the West", published by the Neale publishing company, New York, 1914.

The correspondence with Civil War veterans comprises the bulk of the collection, but is not limited to the battle at Pilot Knob. Even in the initial stages Peterson's contacts expanded the scope of their narratives to cover family history and experiences besides those at Pilot Knob. The battle was the stimulus for contacting the veterans, but as communication developed on a more informal basis, with some correspondents, it became friendly and a platform for expressions of personal feelings and opinions. There is considerable material in the files on post-Civil War America, its politics and economics. Note that the documents are not limited to letters from veterans to Cyrus Peterson. Many letters from Peterson to his contacts are included, and are identified as "Peterson letter"; these are filed under the name of the correspondent.

In addition to the correspondence with individuals the collection contains a number of unit records from the Civil War. Most of these records came from the files of Company H, 47th

---

<sup>1</sup> See Series IB, Peterson's letter dated 1-9-1903 in the Hugo Hoffbauer correspondence (Box 4--Folder 2); and Peterson's letter dated 10-28-1902 in the Henry C. Wilkinson correspondence (Box 7--Folder 1).

## Cyrus A. Peterson: Battle of Pilot Knob Research Collection

### Provenance, Scope, Contents, and Seriation (Contd.)

Missouri Volunteer Infantry. These documents range from higher headquarters printed matter (General Orders and Courts Martial) to requests for details (guard and fatigue) from regimental and post level. Some company level records (muster rolls and equipment lists) are present also. These all appear to have been saved by Henry C. Wilkinson, who was the 1st Sergeant of Company H, and who was also Dr. Peterson's most prolific correspondent on the battle. There are a few documents and orders from other units. There are some typed rosters of units involved in the battle, which Dr. Peterson appears to have obtained from state Adjutant General Offices, and supplemented with data from the federal government and his correspondents. A consolidated listing of these rosters is in the appendix to this document.

There are certain abbreviations used in titles, indexing or describing the contents of letters and documents which the user should note:

- EMM--stands for Enrolled Missouri Militia
- G.A.R.--stands for Grand Army of the Republic.
- HQ-- stands for headquarters.
- MSM--stands for Missouri State Militia.
- QM--means quartermaster.

The "Volunteer" designation in units such as the 47th Missouri Volunteer Infantry or the 14th Iowa Volunteer Infantry is an understood entry in the context of these letters, i.e. 47th Missouri Infantry or the 14th Iowa Infantry.

The collection has been organized into three series based on the subject matter and type of information.

Series I: Documents for Peterson's Book Research . This series is divided into four subseries, as follows:

Subseries A: Military Documents. These have been grouped in the following sequence:

- Confederate Unit
- Union Units--Regular Army
- Union Units--HQ and Administrative
- Union Units--Command Level
- Union Units--Field Level--Iowa
- Union Units--Field Level--Kansas
- Union Units--Field Level--Missouri Independent Militia
- Union Units--Field Level--Missouri Artillery
- Union Units--Field Level--Missouri Cavalry
- Union Units--Field Level--Missouri Infantry

Subseries B: Peterson's Pilot Knob Correspondence. Alphabetically by individual name.

Subseries C: Government Offices. Alphabetically by office name.

Subseries D: Miscellaneous Items. Alphabetically by document source.

Cyrus A. Peterson, Battle of Pilot Knob Research collection

Provenance, Scope, Contents and Seriation (Continued)

Series II: Documents on Reunions and Memorial Associations. Divided into two subseries, as follows:

Subseries A: Reunion and Memorial Correspondence. Alphabetically by individual.

Subseries B: Associations and Businesses. Alphabetically by name of the organization.

Series III: Documents Unrelated to Pilot Knob or Civil War. Alphabetically by the source of the document.

Dr. Peterson was president of The Missouri Historical Society (1905-1906) and it was because of this close tie with the Society that he left these papers in its custody.

The collection was processed in 1992-93 by Thomas Brooks, volunteer, under the supervision of Martha Clevenger, Archivist.

Box Folder      Date    Contents

**Wright's Regiment (CSA)**

1                    1      11-08-1864    On charges against Lt. Crute (Cruite?). Describes condition of Confederate troops after Price's raid.

#### Introduction to the Consolidated Roster

This roster has been assembled from individual company rosters which Peterson obtained from the Adjutant General's Offices of Missouri and Iowa<sup>2</sup>. All these rosters are in typed form with the exception of that for Company F of the 50th Missouri Infantry, which is handwritten on pages from a small notebook. It is not known if this indicates the source was other than the Adjutant General's office. The individual rosters have been annotated, presumably by Peterson based on information furnished by his correspondents. These notes have been incorporated into the listing. From his many contacts Peterson also received additional names to add to the rosters. Information from 1st Sgt. Herman Wald's casualty report for Company G, 1st MSM Infantry is included in the listing<sup>3</sup>. Sgt. Wald took

---

<sup>2</sup>The contribution of the Iowa Adjutant General is uncertain, see the "Iowa Adjutant General" correspondence in Series IC, Box 9 Folder 1.

<sup>3</sup>

Sgt. Wald's report can be found in Series IA, documents for Co. G, 1st MSM Infantry. It is dated 10-3-1864 and is titled "strength return". It is in Box 1 Folder 33. Sgt. Wald Took

command of the company on the 29th of September when the two officers of the company were missing.

Some officers from headquarters of the 47th Missouri Infantry and General Ewing and his staff have been added from Ewing's report in the "Official Register"<sup>4</sup>. These individuals were, of course, not found in company level rolls.

The total number of names on the consolidated list totals more than sixteen hundred. This is larger than the force at the Battle of Pilot Knob. Ewing, in the "Official Reports" (see note 3, below) says he had 562 "old troops" from the 14th Iowa Infantry, 2nd MSM Cavalry, 3rd MSM Cavalry, 1st MSM Infantry and 2nd Missouri Light Artillery and 489 "new troops", from the 47th and 50th Missouri Infantry Regiments. It should be noted that the rosters furnished were not limited to just those men who were with a unit at the time of the battle. The content of the Adjutant's files and their accuracy is uncertain, but it is assumed that these rosters approximate a list of all the men who ever belonged to the unit. These company-level rosters are in the collection, filed in Series IA.

Rosters used to develop this listing are as follows:

14th Iowa Infantry: Companies B, C, D, E, and H

2nd Missouri Light Artillery: Battery H

3rd Missouri MSM Cavalry: Companies A, C, D, H, I, and K

1st Missouri MSM Infantry: Company G

47th Missouri Infantry: Companies A, E, F, G, H, and I

50th Missouri Infantry: Company F

Entries have not been made for Company L of the 2nd MSM Cavalry, no roster was found in the collection. The Missouri Historical Society has a "Muster Roll" poster of Co. K, 3rd MSM Cavalry in its pictorial collection, Catalog #91-001057. This has information on some men and also offers different spellings in some cases.

---

command of the company on the 29th of September when the two officers of the company were missing.
